- **Libraries & Frameworks:** React, Express, jQuery, Node
- **Database:** MongoDB, and MySQL
- **VCS:** Git
- Excellent time management and organizational skills
- Over 14 years experience in customer service

Projects

Rhythm Reviews

GitHub repo: <https://github.com/group7-project2/rhythm-reviews>

Deployed: <https://rhythm-reviews-8a43a75413f9.herokuapp.com/>

A CMS style web application for reviewing music albums developed using JavaScript, and a diverse set of libraries and technologies. The application incorporated the following key components:

Backend Framework: I used Express.js for the backend of the application to handle routing and server-side logic.

View Templating: Express-handlebars was employed for creating dynamic and interactive user interfaces.

Security: To ensure user data remained secure, I implemented Bcrypt for password hashing and encryption.

Database Management: MySQL was chosen as the database system, and Sequelize was utilized as the ORM to simplify database interactions.

Frontend Design: The user interface was meticulously designed using TailWind CSS, providing a modern and visually appealing look.

Deployment: The completed project is deployed on Heroku.

Fancy Minute Chef

GitHub repo: <https://github.com/ejoseph10/Fancy-Minute-Chef>

Deployed: <https://ejoseph10.github.io/Fancy-Minute-Chef/>

A dynamic recipe search engine developed using JavaScript, which integrated two external APIs: EDAMAM and MealDB. The user interface is designed using CSS and Bootstrap, providing a user-friendly appearance.

Education

UConn full-stack web-development certification.
2023

International Institute of Cosmetology, Wethersfield, CT. **Licensed Cosmetologist and Barber**
2011

East Hampton High School, East Hampton, CT
2009
